NEW IN INDUSTRIAL CLEANING

GreenWonder green degreaser

Use : GreenWonder is supplied in liquid concentrate form. For using it, dilute with water in 1% to 10% concentration , depending on contamination type and quantity. Preferred operating temperature is 60 - 70 Deg. C. Application contact time depends on temperature, contamination & method of application. It can be used at Room Temperature , but contact time & concentration required will be more than preferred operating temp.

Special Features :

It is used to replace hazardous & toxic materials like Trichloroethylene (TCE), Perchloroethylene and other caustic cleaners.

It brightens Aluminium , Brass , Copper like polishing and without surface attack.

It prevents corrosion / tarnish.

It removes finger marks.

It removes organic haze from Glass
